

YOUR NEW SIGN HAS ARRIVED!

»»» → You'll be up and running in just a few steps ← «««

The Laser Co provide your sign and corresponding standoffs. You'll also need:

Plugs (if required) and screws

Pencil

Drill and drill bit

Screw driver

Hammer

Also recommended: A spirit level and good DIY skills, or the assistance of someone with the same.

Before you begin

- All installations should take place with the proper tools and safety precautions. Two people may be needed for installation
- The main cause of failed installations is due to the strength of the wall - ensure your surface is strong enough to hold the weight
- All wall types (i.e. masonry/timber/plasterboard) require different hardware (i.e. drill bit, screw, plug) - ensure that you use the correct hardware for your wall
- Plugs and screws are not provided - use the table to determine the size of the recommended equipment for your sign.

Which screws are best for your sign?

Standoff details	Screw size	Recommended wall plug size	Drill bit size
Outdoor Stainless Steel 18mm diameter x 20mm depth* (for signs up to 13mm thick)	8g	8g green	8
Indoor Silver Aluminium 19mm diameter x 19mm depth (for signs up to 10mm thick)	8g	Ramset size 6	6
Indoor Black Aluminium 18mm diameter x 20mm depth (for signs up to 10mm thick)	8g	Ramset size 6	6
Indoor Silver Aluminium 19mm diameter x 25mm depth (for signs up to 16mm thick)	8g	Ramset size 6	6

INSTALLATION INSTRUCTIONS

1

Hold your sign up as you want it to be hung, using a spirit level if required

2

Hold the sign firmly in place and mark the centre of each hanging hole

3

Set your sign aside and pre-drill each hole with the recommended drill bit size

4

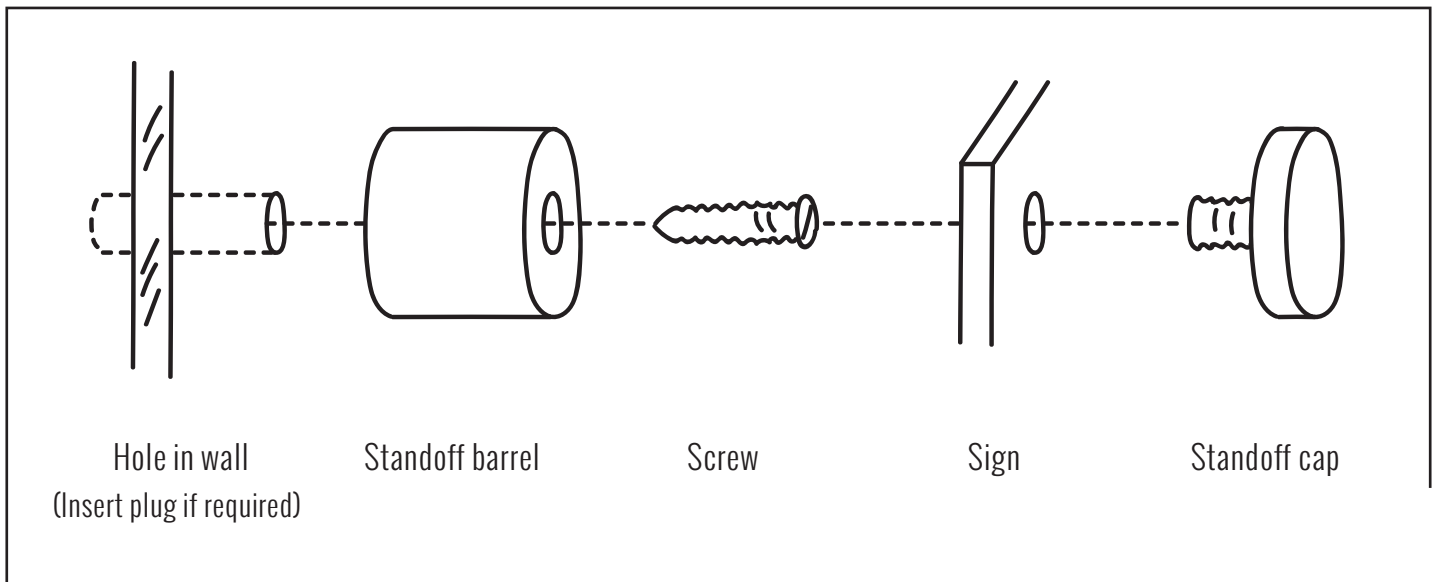

If plugs are required, lightly tap the plug into the hole using the hammer, until the head is flush

5

Line up the standoff barrel with the plug, and screw into place. Do this for all remaining holes

6

Position the sign in place* and affix with the standoff cap, tightening firmly

* Plastic washers are supplied with outdoor standoffs. These should sit either side of your sign before the standoffs to protect it.

Thank you for choosing The Laser Co, we look forward to working with you on your next project
